<u>Application Name:</u> Headgear Hub

<u>Application Description:</u>

Our application will provide an online store for pictures of various hats. Each user will have an account where they can add funds, save hats, add hat preferences, and share hats via URL links. We will set up a database storing customer information, hat information, warehouse information, vendor information, and order information. This data will be served on a webpage for users to browse and shop for hats.

The value our application will provide is allowing customers to add to their hat picture collection in an easy and convenient way. We will also give a wider variety of hat options for customers to come to one place for all their hat needs. Our hat picture prices will also be unbeatable, giving customers a great option for their hat-buying experience.

Vision Statement: For hat wearing individuals, Who want to indulge in buying various types of hats in one convenient, easily accessible place. The Headgear Hub is an online store that allows access to various types of hats that are all equally world class in one easy, accessible website. Unlike Lids, our product offers better, cheaper hat pics of all varieties.

Version Control: https://github.com/MaksimSeniw/BSMASH
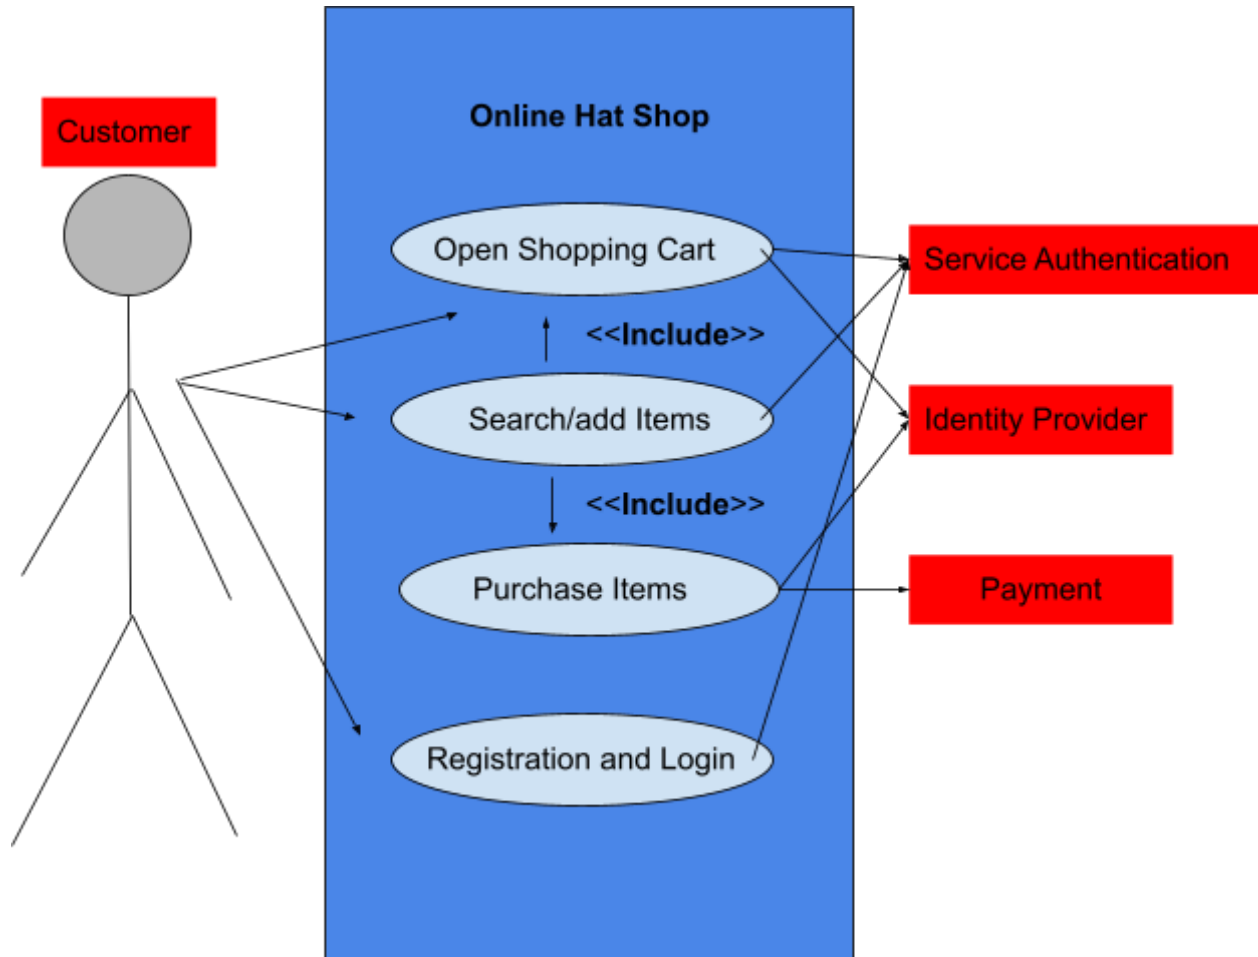

Development Methodology: Agile

Communication Plan: Discord

Meeting Plan:

> Team Meetings: Mondays after 3:30, Sundays

> TA Meetings: Mondays: 4:15PM
